

# ninja + TeamViewer

Ninja offers the best TeamViewer integration in the industry! The license offers unlimited connections; allowing you to remotely control and communicate with your endpoints, directly within the Ninja portal!

## ABOUT TEAMVIEWER

TeamViewer is a cloud-based application that provides an intuitive, fast and secure way for remote control and screen sharing. Since its inception in 2005, over a billion unique devices have installed TeamViewer and over 90% of Fortune 500 companies rely on it. It features the highest security standards and practices such as two-factor authentication, 2048-bit RSA private/public key exchange, and 256-bit AES session encryption.

TeamViewer is 100% cross-platform and is used to manage Windows, Mac, Linux, iOS, and Android devices through the web or on its native/mobile applications.

## TEAMVIEWER AND NINJA INTEGRATION

- One click launch TeamViewer session; get connected within seconds.
- Deploy, activate, and uninstall TeamViewer automatically and remotely on Windows and macOS.
- Users and permission sets are always in sync. Never worry about either system being out-of-date.
- Manage clients by means of attended or unattended access, with customized passwords and security settings.
- Report on TeamViewer connection details and session length through Ninja's integrated reporting.

## TEAMVIEWER FEATURES AT A GLANCE:

- Service Queue

## TEAMVIEWER BENEFITS

- **Multi-Platform** – Connect from PC-to-PC, mobile-to-PC, PC-to-mobile, and even mobile-to-mobile with connections that support Windows, macOS, Linux, Chrome OS, iOS, Android, Windows Universal Platform, and BlackBerry operating systems.
- **Zero Configuration** - TeamViewer works behind firewalls and automatically detects any proxy configuration out-of-box.
- **High Performance** – Intelligent connection setup and routing, efficient use of bandwidth, fast data transmissions, remote session framerates up to 60 fps, and automatic quality adjustments ensure an optimized user experience.
- **High Security** – TeamViewer utilizes RSA 2048 public/private key exchange, AES (256 bit) session encryption end-to-end, random passwords for one-time access, optional two-factor authentication, and access controls via trusted devices as well as black and whitelists.
- **Ease of Use** – Enjoy a state-of-the-art user interface that is clearly arranged, simple, touch-friendly, and quick to operate.
- **Maximum Compatibility** - TeamViewer runs on a broad spectrum of operating systems ranging from state-of-the-art system software to older operating systems.

## SUPPORTED OPERATING SYSTEMS
